## WORK EXPERIENCE

**Research Scientist & Agentic-AI Specialist (as external collaborator at Unlimidata)**

01/10/2024 – Current

The development projects with Unlimidata involve research on LLMs and other AI techniques (Symbolic and Sub-Symbolic) to ensure Data Curation. My focus is about Retrieval-Augmented Generation and Agentic AI in a Neuro-Symbolic context.

The procedure of becoming a full member at Unlimidata is currently under discussion.

## EDUCATION AND TRAINING

**02/01/2025 – CURRENT** Vienna

**PhD - BilAI project** TU Wien

**01/10/2022 – 17/09/2024** Rende, Italy

**Master's Degree in Computer Engineering (AI & Machine Learning)** Università della Calabria

Theoretical Computer Science, Big Data Analysis, Optimization, Data Mining, Multi-Agent Programming, Artificial Intelligence, Computer Vision, Information Retrieval, Natural Language Processing, Machine Learning, Deep Learning, Knowledge Representation, Social Media Analysis

**Final grade** 110 e lode | **Thesis** Integrating Trustworthiness and Fairness Properties in a Multi-Aspect Agent-Based Retrieval-Augmented Generation System

**01/10/2019 – 15/09/2022** Rende, Italy

**Bachelor's Degree in Computer Engineering** Università della Calabria

Logic Networks, Agent Oriented Programming, Fundamentals of Automatic Control, Operating Systems and Parallel Programming, Algorithms and Data Structures, Digital Electronics, Telecommunication Networks, Databases, Computer Networks, Software Engineering

**Final grade** 110 e lode

## SKILLS

Agentic AI techniques: RAG, Advanced Prompting, Agent Planning | LLM orchestration frameworks: LangChain, LangGraph | Distributed computing frameworks: Storm, Spark | Machine learning frameworks: Pytorch, Tensorflow, Keras | Data mining: Rule discovery algorithms | Artificial intelligence: Machine Learning, Deep Learning | Programming languages: Python, Java, C, Scala, Prolog, Haskell | Symbolic AI: Knowledge Representation, Knowledge Graphs

## PROJECTS

**GaV: Generate and Verify of Column Semantics**

Upcoming paper work. GaV is a multi-agent architecture for the aspect based column understanding (ABCU) deployed in Unlimidata. It involves a cycle of generation and verification, which produces a data understanding through discovery of deep semantics of columns in databases.

**Rule2Code**

Rule2Code is a multi-agent architecture for translating natural language rules into a selected language. It is already been deployed in collaboration with Bank

of Italy, using a Rule2Vadalog eco-system to run data quality checking rules over millions rows of databases.

## LANGUAGE SKILLS

**MOTHER TONGUE(S):** Italian

**Other language(s):**

**English**

**Listening** B2
**Spoken production** B2
**Reading** B2
**Spoken interaction** B2
**Writing** B2

*Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user*

## COMMUNICATION AND INTERPERSONAL SKILLS

### Working and collaboration in a group

Skill acquired while carrying out group projects at university and developing projects inside Unlimidata.

### Empathize and listen

Understanding people's emotional state, problems and strengths allows me to help them bring out the best in themselves.

## HONOURS AND AWARDS

**25/03/2024** Università della Calabria

### 5x1000 Unical Funds Award

Award given to university students who have distinguished themselves for their commitment to studies in the 2022/23 academic year thanks to the 5x1000 funds allocated to the University of Calabria. Same prize is reached for the 2023/24 academic year.
